

M AYADHAR NAYA K

WARNS THE WORLD FOR THE FIRST TIME

ASIA
IN
DANGER!

ALIENATED ASIA UNDER THE INFLUENCE OF
EAGLE AMERICA'S

ECONOMIC

TERRORISM

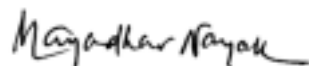

America, the devil designer of terrorism, has started its operation for the undeclared Third World War in a shrewd manner. The only weapon of this world war is nothing other than a negative economic theory that is intentionally being practised by America as a drastic and dangerous attempt to destabilise the financial status quo of the third world on one hand and especially to alienate Asia from its own oriental root of values on the other. Now this negative economic conspiracy is going to create an acute condition in our confused continent, starting from the SARK to golf countries. No doubt, all we are going to face the most furious type of terrorism that is trying to trap the entire Asia in its notorious network. Oh yes, it is certainly the economic terrorism in disguise of so-called global meltdown which the whole world is experiencing at present. Now-a-days our media is also very much busy in focusing its interest on this concept of global economic crisis. But in reality it is the deadly economic attack of cunning America on Asia in such a subtle and shrewd manner that our media even fails to feel it. Due to this attack, now Asian economy has become so depressed that nobody can expect a fine morning of prosperity to come soon.

It is not either global meltdown or recession. We will say, rather it is economic terrorism. Yes, our country is passing through this tunnel of terror. Our continent is continuously sensing an insecure future under threat. World's largest and the most populous continent Asia has become helpless just because this erratic economic invasion by knavish America.

Now the demon America is playing its dirty game of 'Divide and Rule'. Let's examine a case study. China was importing iron ores from India. But just because of this sick or weak economy (declared by America to make the world market know), China has refused to buy iron. India is also failed to increase its revenue from this source. This situation has brought about a cold and silent war between India and China.

It is high time to recognize the evil intentions of America and take action immediately against this economic terrorism. One on Asians! Let's join hands and fight together to finish this fury! Indians, Japanese and Chinese must come forward with other Asians to protest America in order to get rid of this economic terrorism. Japan even could revive from the ashes itself after The World War II. It has the immense power to control the economy. So, Japan must act as the main leader and call all the Asian countries to be united in one camp and maintain economic stability again in Asia. Instead of fighting with each other economically, these three major Asian countries must co-operate each other to defeat America. At any cost, the identity of Asia must not be ignored at all. We must be proud enough that we are Asians and our Asianism must be attained, maintained and sustained by us. This devil America's evil work will no longer be tolerated. Protagonist positive Asia must teach a lesson to antagonist negative America for creating conflicts and confusions among Asian countries. Then only America will have no guts to play its own drama of danger with Asianism.

The joining hands of India, Pakistan and China under the unique leadership of Japan will definitely regenerate the renaissance of Asia to be remembered for milleniums to come.

dated 7th january 2009

The manifesto of Economic Terrorism!

On 14th October 2008, I was coming from Paradip port to Sukinda chrome valley, I stopped near a restaurant to have some food. Suddenly I noticed the owner and cleaner were praying, "Oh God! Please let the iron-ore trucks run on the road again".

I asked, "What happened! If you pray God, will the trucks run?"

The owner replied, "Sir! When trucks were going Paradip port, at that time our restaurant was running very successfully. But now the business is zero. Even I can't pay the workers".

However, the same thing is happening all over the world now. Starting from a poor person of Asia to the President of America, all are saying it is just the global meltdown that has weakened the world economy. But we are saying it is not. No, it is not at all an economic ailment only. Rather, it is economic terrorism in true sense. The concept of economic terrorism is not new. We are only observing the branches. But the root of this economic terrorism was planted many years ago.

This economic terrorism has become so wide-spread that the cleaner of a small restaurant even can feel its inevitable impact. Around 90% iron-ores are exported to China from Orissa. The main exporters of these iron-ores and chromites are Badbil, Joda, Daitari and Sukinda. Through trains or trucks these ores come to Paradip port and from

there by ships they go to China. For this transportation, 25000 trucks were employed. But suddenly China stopped buying iron-ores. It is saying that it has stored sufficient iron-ores. Now in China around 150 million tones steel are stored which is 3 times more than the quantity of steel produced in India per year . Similarly , the quantity of iron-ore rawmaterials is around 140 million tones in China. It has stored all the iron-ores by importing them from Orissa, India since many years. We may not believe, but it is true that China has more iron-ore mines than India. Still it has not raised the mines yet. It is storing the mines to be used for future if any crisis arises. After storing more than enough, now China refuses to import iron-ores from Orissa. We are ready to decrease the price, but China is saying "No".

If the root of a tree is going to die, no one can save its branches, fruits and leaves. Now the same thing is going to happen with America. It had made its resources and properties at the cost of social benefits of other countries. Through various schemes, repeatedly it had exploited other countries financially. Such greed of America to enjoy the biggest share in the market has ultimately put it in trouble. Market

If the root of a tree is going to die, no one can save its branches, fruits and leaves. Now the same thing is going to happen with America. It had made its resources and properties at the cost of social benefits of other countries.

situation has become so unstable that America is failed to revive from it now.

Let's go to the flashback. Rich American banks were providing loans to companies without taking interest and enjoying their big shares. After a short span of time these banks also started to provide loans to common people in the forms of car loan, house-building loan, personal loan etc. Plenty of products in the market had been sold when people got extra money in their hands. But with in a decade, the demand for such supplied products became miserably less. So, ultimately

producer companies who were in work for products faced losses in the market. Their levels of profit started to fall. American citizens could not repay the loan. Depositors even failed to withdraw their amount from banks. Suddenly, it was declared that American banks have no surplus money. Due to misuse of money, America was bound to reduce the ratio of its import from other countries. Finally, this situation has called for an acute economic ailment in other countries too.

On the other hand, to fight with America from the standpoint of financial front automatically China

has opened its world-wide market. It is offering the products with low price and taking away most of the monetary benefits from the world economy. China is so happy at its profitable export activities that it has forgotten to import from other countries now. China's import activity from other countries is almost stopped now due to the so-called global meltdown that was preplanned by America. This has ultimately brought about a serious economic setback in those countries that had kept long relationship with China so far the export business is concerned.

However, finally Japan and China could create a fear-complex for America in this economic power play. It is said that everything is fair in love and war. So, in spite of a long experience of its own revolutionary role to make a model society for the working class, the red China has started its blue operation in order to reform its economy with a capitalist attitude at present. Everyone knows that China is a communist country. But now to make itself economically more powerful, China is following the character of capitalism. Also the concept of globalization is proved to be helpful for China. Through this process, now China is taking away wealth from other countries as export earnings without importing

Suddenly, it was declared that American banks have no money. Due to shortage of money, America became bound to reduce its import from other countries. Finally, this situation has called for a serious economic ailment in other countries too.

anything. Similarly, Japan imports chromites from Sukinda, Orissa. At the same time, by using chromites as the raw-material Japan again is producing enormous goods to sell in India along with other countries. So, the entire amount of money we get from imports is being taken away by Japan while exporting its goods in our market with the maximum profit. We must know that this profit is certainly ten times more than the actual cost. Ultimately, both China and Japan are enjoying all the economic opportunities at the cost of national benefit of other countries.

India is very much enriched with chromites and iron-ores. But it doesn't know how to transform them from the ordinary raw materials to the attractive exportable products for its own economic benefit. We must have other options and alternatives with us to meet the financial crisis. But by utilising our resources, Japan and China are becoming more and more prosperous.

Yes, we have lost our future in this present economic decadence due to lack of knowledge about our own resources. Finally this has called for hunger, starvation, poverty and unemployment to rule over

If a country is frequently exporting its natural resources to foreign countries, the citizens of that export country are the most unlucky ones. So it is needless to say that the government of that country also is incompetent, useless, incapable and really an idiot.

India. Other countries export their technology and make them rich whereas we are still foolishly exporting our natural resources without a minute's second thought. All must be aware of the fact that if a country is exporting its natural resources to foreign countries, the citizens of that export country are the most unlucky ones. So it is needless to say that the government of that country also is incompetent, useless, incapable and really an idiot.

It is a general phenomenon that savings must be higher than expenditure. Then only, optimal

condition can be achieved in a man's life. But here our government is doing what a regular wrong !It is going on diminishing our own resources to earn foreign revenues. This may continue for a specific period of time. But when we will have no resources or our buyer countries won't be agree to deal with us, then what will our State do? It is high time to think about this issue. Let's discuss a case study which may enable our country to really take some action for economic benefit.

1929 is regarded as the year of Great Depression in all over the world. Now it's a subject matter of history and economics. But still

it has great educative values which must be taught to our nation now. At that time due to depression, there was no much more hope for income and employment. Poverty was prevailing everywhere. There was no development of science and technology. People were not so skilled too. However , this Great Depression was continued till 1933. Again, at that time the whole world was divided into Capitalism and Socialism. America was the main leader and supporter of Capitalism whereas Russia was in favour of Socialism. All other countries including India were economically weak. So, they were following a mixed principle of capitalistic socialism. By this, they were getting the support of these two leader countries. The desire to gain more economic power among countries finally called for The W odd W ar I . This war resulted in severe losses all over the world. Though the critical condition of this dreadful war did continue for 5 years, still the effect could be felt till another 25 years. Normal situation in the economy had been achieved after 25 years of the war .That was the scenario of India 80 years ago.

Now the world is going to face the depression which will be 10 times higher than the Great Depression 1929 , if this intolerable global meltdown prevails any more.

Now in the present context the entire third world is going to face the depression which will be 10 times higher than the Great Depression of 1929, if this sort of intolerable global meltdown prevails any more. At that time economist J.M. Keynes was there to guide the State. All capitalist countries followed his principles to revive from the Great Depression. The basis of Keynes' principle was to control depression, people must have demand to buy goods from the market. The State must enable them to satisfy their wants. It must expend from its revenues. If State would expend, then people would have money in their hand. With that money, they would buy products. Economic exchange would take place. At any cost, there must be enough money in the hands of people. If there is no employment, then it's the duty of the State to provide employment. A State must generate income and employment to uproot the fear complex that created by any economic emergency. It's not an issue if the State provides income to its citizens by enabling them to dig holes first and again fill the holes with the same soil. The concept was that there must be employment to get income. It was the

A State must generate income and employment to uproot the fear complex that created by any economic emergency. It's not an issue if the State provides income to its citizens by enabling them to dig holes first and again fill the holes with the same soil. The concept was that there must be employment to get income.

situation before 80 years. Now it's not possible to dig holes and fill them up with soil.

On the other hand, all socialist countries followed the principles of Karl Marx, the greatest thinker of twentieth century. They applied that to their economy and could solve the basic problems of their countrymen at that time. A time came when the capitalism feared to fail and the socialism became much more active to control the Great Depression. A socialistic attack on capitalism finally brought normalcy in the economy. Optimal condition was achieved with the

development in the basic needs, education and health.

The fundamental principle of Karl Marx was when the demand for goods and services increases their price also increases. The increase in price can be continued till a particular period of time. But again in the long run, the demand falls with more and more increment in the price. When demand falls, production or supply also becomes low which ultimately results in retrenchment of labourers. So, to control this both demand and supply must be in equilibrium position. According to the demand, production must be done. Then only, our economy will be stable.

However, globalization promoted has export-import facilities to run smoothly among various countries. Now with the course of time, India's export activity is going through jerks and obstacles as the demand of import countries for Indian products is falling day by day. Now ideas and technology are being sold in the market with a regular process. Unfortunately, India is not so rich in both. To earn foreign revenues, India is totally dependent on its natural resources.

But with the presence of a secret economic emergency all over the world, no other countries are ready to import from India at present. So, India can't fully depend on imports now to increase its revenue due to this much publicized gravity of global meltdown propagated by the news channels or various multi media groups that are being misutilised in the dirty hands of America frequently.

Nobody can say how long this chaotic economic condition will run in the world. But if this situation prevails for minimum one year, then

India can't fully depend on imports now to increase its revenue due to this much publicized gravity of global meltdown propagated by the news channels or various multi media groups that are being misutilised in the dirty hands of America frequently.

small and marginal industries will face great losses. This devil step to create such type of damnable economic emergency by America behind the screen will make India the worst sufferer in the world. It has resulted in retrenchment of labourers to a great extent, disproportional distribution of income, diminishing production activities and consistent fall of demand in the market.

Now again it has been declared by United Nations (UN) and International Labour Organization (ILO) that 50 million nos. of jobs are going to be abolished soon from the world economy by the end of 2009. Along with that, more than one lakh Indian and Chinese employees with six-digit salaries who are working in America will be sacked very soon.

The state is requesting corporate houses to reduce the price of the produced items and to stop retrenchment of labourers. After all, people must have enough income with them to enable the market stable. But these industrialists and entrepreneurs by following capitalism are ignoring the State. Very shamelessly they demand that the State must reduce the production taxes and interest rates. If State becomes agree

The economic calculation of India is proved to be wrong again and again. There is no fair share for all to attain the social equality. Rather poverty, inequality and unemployment have become the features of Indian economy now.

with their proposal, then there will be reduction in revenues and if denies then again our working class along with the rational interest will face the unbearable burden of losses. So, the State is in dilemma. It is failed to decide what to do and how to solve this problem.

The economic calculation of India is proved to be wrong again and again. There is no fair share for all to attain the social equality. Rather poverty, inequality and unemployment have become the features of Indian economy now. We are the poor victimized viewers of our own foggy future from this tragic third-world who

have witnessed a modern melodrama of spending money for 'Big Bang' experiment which has no practical value. Few days before, it was announced everywhere that the world is going to be destroyed on 21 December 2012 according to Nostradamus (born Dec.14, 1503, Saint-Remy, France - died July 2, 1566, Salon), the famous French astrologer and physician known for his prophecies. He began making prophecies in 1547 and in 1555 they were published in a book titled 'Centuries'. He wrote them in rhymed quatrains, using a cryptic style that mingled French, Latin, Spanish and

In addition with the tragedy of this mystic theory that the entire World is in a precarious position to meet its last date on 21st Dec. 2012, suddenly and simultaneously we have come across a shocking news coverage through the media regarding this vicious economic terrorism in disguise of global meltdown. What a strange coincidence!

Hebrew. His prophecies are still widely read; readers have discovered apparent predictions of such world events as the French Revolution and The World War I! In addition with the tragedy of this mystic theory that the entire World is in a precarious position to meet its last date on 21st Dec. 2012, suddenly and simultaneously we have come across a shocking news coverage through the media regarding this vicious economic terrorism in disguise of global meltdown.

What a strange coincidence! But is it really a coincidence or a cunning attempt by Eagle America to make the masses of Asian countries into assentive asses? To stop it scientists from all over the world had conducted many experiments where huge amounts of money were spent. Things are not ending here. One and all national along with local news papers printed and published from various parts of our country also joined their hands with this type of confusing campaign.

India is a superstitious country. It believes that by worshipping God we can stop the world from this so-called recession, destruction or delusion. So, a Maha Yagyan organized by the spiritual priests from

Uttar Pradesh, Bihar , Madhya Pradesh, Rajasthan and Gujarat took place in India to save the entire world! They did also pray God to control global meltdown! The expenditure budget of this yagya is around Rs. 150 crores. What a funny situation! Can anybody analyze it from depth? The leaders of our country are crying that we have no surplus money. Labourers have been retrenched from job due to non-payment. In such a crisis, how the State can think about this Yagya which has no practical utility at all. Why we are entertaining this farce? How can we forget our labourers without whom our economy can't function? Why they are becoming the worst sufferers? Can the State answer these questions?

Labour is the most important factor of all production activities. It can't be ignored. But now with the emergence of so-called global melt-down, our workers are not getting their reward. Their share is taken away by the employers and capitalists. Where has gone the Labour Theory of Value? If we go to the pages of history we must come to know where labour got exploited there revolution took place and that revolution called for not only the civil war among the affected countrymen, but also the devil war with its worldwide impact. It is

Labour is the most important factor of all production activities. It can't be ignored. But now with the emergence of so-called global melt-down, our labourers are not getting their reward.

true that no development can become possible at the cost of ignoring labourers. When the exploitation crosses their tolerance level, they burst out and revolt against the whole system. At that time, they generally become so powerful that no force from any other part of the world can defeat them.

'Hunger' is a phenomenon which does no rule, no regulation, no ethics, no designation.. just nothing. When labourers won't get their wage, they will start revolution. They won't obey anything. At that time, it will become very difficult for the State to tackle the situation. Finally, the State will call 'Destruction'.

Let's switch-over to our political system. Now the working class has become main weapon of every political party to win votes. They are large in numbers and are the real makers of a government. Before election ministers, MLAs, MPs spend the black money of industrialists/financers for campaigning and promise to conduct many developmental activities for the working class. By getting the votes of working class they win in election and come to power. But after winning, they simply don't care for the working class. Did anybody ask where the commitments have gone? What benefits our working class is going to get?

The financiers/capitalists who provide money for election campaign gets their bills and tenders passed if their candidates win. But what our working class is getting apart from false commitments and promises? There is no satisfactory answer to this question.

Our countrymen think that Prime Minister, Chief Minister and other ministers are the dearest messiahs or direct messengers of almighty God. What they are promising they must work on that. But our expectation fails again and again. The candidates after winning election enjoy supreme power. The financiers/capitalists who provide money for election campaign gets their bills and tenders passed if their candidates win. But what our working class is getting apart from false commitments and promises? There is no satisfactory answer to this question. Now repeatedly after losing hope and getting false promises they have become very dissatisfied with the present economic system.

We have lost our destination before. Today again we are passing through a blind lane of economic terror. In this critical condition we don't have any Marx, Lenin, Stalin and Mao Tse-Tung to guide our working class. Socialism is completely sick at present.

There is no single Government for the whole world. United Nations is also under the control of few rich capitalist countries. Activities of the whole world are determined by these few countries. Now when these selfish dictator countries are in danger, why other countries will bear that?

America and England are the self-declared guardians of the world. China, India, Pakistan and other Asian countries have no impact on the world economy. G-7, a group of 7 industrialized developed nations, was established to meet the financial crisis all over the world. Such countries are France, Japan, United Kingdom, United States of America, German, Italy and Canada. Their common fund was deposited in World Bank. This G-7 group provides loans to underdeveloped and developing nations with low interest rates. If a country fails to repay the loan, then this G-7 group takes away the natural resources of the borrower country. They also declare war if the borrower country starts to revolt. Like this, these capitalist countries have opened the secret door of undeclared World War III. It won't be a strange issue if The World War III takes place on the basis of the economic issues. Also, the enmity among the Christian and Muslim countries may pave the way to this war. Perhaps India, Pakistan and China can find out a solution if they co-operate each other. In this regard we must not forget the first and foremost role of Japan, the great Asian warrior. Yes, Japan should come forward to emerge as avant-guard for the sake of saving Asia from the claw of Eagle America. Thus, the undeclared World War III can be stopped.

It won't be a strange issue if The World War III takes place on the basis of the economic issues. Also, the enmity among the Christian and Muslim countries may pave the way to this war. Perhaps India, Pakistan and China can find out a solution if they co-operate each other.

When Rome was burning, Nero was playing flute. Like Rome the world economy is going to destroy, but our bureaucrats are not doing anything. They are busy in merry-making and cheerfully touring from here to there by forgetting everything. In its own trust of destiny path, India has lost its destination. Our economy is passing under threat and terror. In this critical junction we are getting no support from these so-called bureaucrats. They are busy in making their own assets at the cost of national benefits. They are building big cities and spending huge amounts of money for so-

called unnecessary beautification. No money is spent on the benefits of poor labourers. Only elite class has become benefited always. This has finally called for unequal distribution of income and expenditure in the economy. How can we think about development when poverty and unemployment are still ruling the State?

We always think about ourselves. We don't observe what is happening in our area, state, country and all over the world. We are failed to analyze devil America's evil plans. With that cunning master-mind America ruled over the world since many years. But now due to loss in share

and stock markets, America's capitalism is failed to survive. It has become the biggest loser in the present scenario.

As American economy was playing the major role in dominating world market, its impact could be felt in other parts of the world also. Even our India is not also free from this chain.

Globalisation is collapsing

Before 20 years, we didn't have such kind of situation. In 1990 the concepts of Globalization and Privatization came to power. Entrepreneurs got the power of monopoly in production with less intervention from the State. More freedom had been given to private corporate houses with the aim to increase production and to gain more foreign revenues for the State. By imposing taxes, State was collecting its revenues. But with the passage of time entrepreneurs and capitalists became greedy and wanted to enjoy all the profits. Our economy became weak. People got less money with them. Ultimately, their demand to buy products in the market went on diminishing. A consistent fall in demand generated stop in supply. Finally, factories and industries were locked out. Workers became idle. After that, everything in the

In this regard we must not forget the first and foremost role of Japan, the great Asian warrior. Yes, Japan should come forward to emerge as avant-garde for the sake of saving Asia from the claw of Eagle America. Thus, the undeclared Third World War can be stopped.

present context is opened before us. Now globalisation is also collapsing.

Some experts are saying that this situation may prevail for few months. But in reality nobody can predict about the economy now in this ever-changing world. However, we can't hide the truth. We must admit that there is a need of socialist attack on capitalism as soon as possible. Socialism has to come forward to save us from this economic terrorism.

When a new concept starts to operate it faces many adverse situations. It is a general phenomenon. So, some sectors are welcoming socialism while some are not in favour of this. A conflicting situation is always present in our economy. Sarkozy, the President of France has proposed all countries to accept socialism. According to him, America is the main culprit behind this economic terrorism. His views are further accepted by China, Japan, India, Brazil, Korea and Russia and also by European countries. Now these countries are ready to fight with America to stop this so-called economic terrorism.

But on the other hand the former President of America George Bush is not in favour of socialism to control the economy. He rather

When a new concept starts to operate it faces many adverse situations. It is a general phenomenon. So, some sectors are welcoming socialism while some are not in favour of this. A conflicting situation is always present in our economy.

supported to go for a correction in capitalism concept. According to him after restructuring the capitalism again we should think about controlling the economy. The Prime Minister of India is completely agree with at present American attitude which is in favour of capitalism too. But Mr. Prime Minister failed to achieve the support from Left Fronts. They are simply opposing and have started revolution. So, Indian economy is internally prepared to be free from the dominance of America in near future.

The main reason behind the ruling class of India depends on

America for the sake of coming General Election. As the country is suffering from a financial fever it is dependent on America in all the economic areas. But our country has forgotten the losses other countries experienced in recent past by depending on America. However, now Bush is not in power. But who can say that with the leadership of new President Obama, everything will be changed in America! It's wrong to think that Obama won't dominate India.

Discussions are always taking place among 20 rich countries of the world, The World Bank, International Monetary Fund and

UN representatives in regard to overcome this economic crisis. But till now they have not found any solution. No ideas are coming to their mind. But why? Why they have no ideas? Because everybody in the system has become so corrupt that their mind has become a devil's workshop now and a devil can never think about development. But after analyzing every loss isn't it high time to change our mindset?

Bureaucrats and experts are saying that there is no solution of this economic terrorism. I am really very shocked by their statement. Definitely the whole world is seriously looking for a solution and if in this critical phase we become idle, then what will our countrymen expect from us? Will it be a justice for all? How can they comment on this serious issue so lightly and superficially! I challenge the whole world that prosperity and boom will be achieved again in our economic cycle. I have developed a new theory to solve this crisis. Let's examine it.

By imposing taxes,
State was
collecting its
revenues. But with
the passage of time
entrepreneurs and
capitalists became
greedy and wanted
to enjoy all the
profits. Our
economy became
weak.

Eagle

America

This land of luxuries is so dual in nature that at one side it can build-up the base of terrorism and on the other side it can generate awareness programmes to stop the inhuman activities of the same.

Now America is dominating the world market. It is repeatedly taking away ideas, technology and talents from Asia, the greatest continent of human values at the cheapest price. The super-normal profit seeking capitalists and entrepreneurs of America have started a dirty trend to influence our personnels to run after a readymade lifestyle of the wine, wealth and women for the sake of some secret deals and contractual agreements ! This land of luxuries is so dual in nature that at one side it can build-up the base of terrorism and on the other side it can generate awareness

programmes to stop the inhuman activities of the same. These economic terrorists of the market don't obey any ethical attitude along with the human rights. But unfortunate condition arrives when this complicated continent starts playing its power game to pollute the political environment and economic administration of Asia with an ill intention for making the same as a mere puppet in its own hands. America is simply dominating Asia politically, economically and socially. It makes governments in Asia and breaks those too. As Asia is depending economically on America, it can't think about any change just now.

In spite of all evils America is also the lucky land where the great humanitarian statesman Abraham Lincoln and the noble poet of democracy Walt Whitman have put their footprints.

Many positive developmental activities were conducted by America in past. But what happened to its glory now? Where is humanity lost?

However, it is heard from some secret sources that now America's notorious spy network C.I.A. is going to be broken because of a suppressed discontentment among its members. If this happens then many unknown, undiscovered and secret evil plans of master-mind knavish America will be opened in all over the world. We simply can wait for this troubling truth to be exposed in limelight.

In spite of all evils America is also the lucky land where the great humanitarian statesman Abraham Lincoln and the noble poet of democracy Walt Whitman have put their footprints. Many positive developmental activities were conducted by America in past. But what happened to its glory now? Where is humanity lost? When devil started to rule America? How the ethics of White House have become toys in the hands of few selfish capitalists?

Can anybody recall that barbarous incident happened few years ago? Let's go back to those days when Saddam Hussein, the widely

accepted statesman of Arab, was imprisoned and hanged by Bush government. His fault was that he didn't want foreign intervention in his country and to stop that he had selected the way of violence. However, that is a different issue. But he was hanged till death after a superficial hearing of American judiciary system. The level of barbarity crossed all limits when the execution of Saddam Hussein was witnessed by the entire world through the live telecast in various television channels at that time. Yes, the whole world was watching Saddam Hussein hanged till death. Through this live telecast America wanted to convey the message that who would revolt against its administration, he would be hanged like that.

Saddam Hussein was a strong supporter of India. But it was India who didn't utter a single word in favour of Saddam. It became just a silent spectator at that time. The largest democratic country of the world forgot its ethics and threat and terror ruled over democracy. After that what happened is history now.

Again, Congress came to power in India. Manmohan Singh became the Prime Minister with the blessings of Mata Rome Sonia Gandhi. Both started to compromise with America which in turn called for a strong economic relationship between the two countries. This relationship only increased the funding force and source of Congress without doing anything for the development of India.

Again, Congress came to power in India. Manmohan Singh became the Prime Minister with the blessings of Mata Rome Sonia Gandhi. Both started to compromise with America which in turn called for a strong economic relationship between the two countries. This relationship only increased the funding force and source of Congress without doing anything for the development of India. Now it is declared by the government of India that around Rs. 300000 crore will be spent for the development of our country. But this announcement is simply a farce. All these types of announcements are generally made before election. But can

anybody answer from where Indian Government is getting such a huge amount while the high voltage of global meltdown is still being charged by America in a melo-dramatic manner? The American continent which can provide such a huge amount of money as grants or aid, it is facing depression - can it be believable? Can anyone believe it? Let's think from the depth. Analyze the whole concept of the so-called global meltdown on economic predicament prevailing now. We can get the answer.

'Global meltdown' - it is just nothing, other than an applied farce created by America. Like an eagle, waiting to hunt very cautiously, America is watching the world economy and repeatedly hunting it when getting a chance. When its hunt begins and reaches to the peak, at that time it declares the economy 'weak'. Our economists, intellectuals, experts and whole system are being baffoned by this cunning America again and again. They have just become the Guinea Pigs to be experimented in the laboratories of American economy.

We must not trust America. It is always fond of creating crises through war and war can't bring development. We must be aware of that. The human history has felt the fear of hearing that horrible nuclear bombardment on the overseas Japanese soil by America. Both Hiroshima and Nagasaki - a pair of fair towns of Japan - have already tolerated the unbearable death-touch from America during The World war II. This terrible tragedy is still remembered as the worst inhuman eventuality among the Japanese. This warfare of The World War II called for over 200,000 deaths, nearly all civilians in both the cities.

Both Hiroshima and Nagasaki - a pair of fair towns of Japan - have already tolerated the unbearable death-touch from America during The World war II. This terrible tragedy is still remembered as the worst inhuman eventuality among the Japanese. This warfare of The World War II called for over 200,000 deaths, nearly all civilians in both the cities.

America is also the merciless murderer of communism in China and Russia.

America is also the merciless murderer of communism in China and Russia. The sacrifice of Lenin and Stalin in Russia and Mao Tse-Tung in China to establish communism have become the subject matters of history only. Now capitalism is the big boss in both countries and the commitment of communism has proved itself to be a total failure after their long process of struggle for proletarianism.

First Japan, then Russia and again China- could not save themselves from eagle America's claw. We must remember that the single continent of these three countries is none other than Asia. But why this eagle America is constantly concentrating on calamity in Asia alone? Why not in Europe? The reason is quite clear. This is happening because Asia is the land of wisdom and knowledge whereas Europe is enriched with mechanism and materialism. Knowledge and wisdom have no end and alternative. America is dominating the world by taking away Asia's ideas, thoughts and talents. After Japan, Russia and China- now it is India which is going to be hunted by eagle America. This knavish cunning America has started making our military systems, spy agencies, crime branches, police force, officials and administration greedy and corrupt by offering its black money. Now military and political

wars are over. But a strange economic war has got its momentum gradually with a killer instinct. Though it can't be seen, its impact can be felt everywhere. Here, without any military manifestation America is planning to eliminate the economic entity of India.

All the intellectuals are requested to start research on this economic terrorism, analyze the fact and be cautious and find out the best way to get rid of this negative network woven by America.

American Economy: From Black money to Blasphemy

It's not a heavy task to recognize this economic terrorism. So much brain exercise is not needed for that. Still why our expert economists and intellectuals are walking so blindly? Not only blind, they have become deaf and dumb also. Are they purchased by America now at a very high price? These opportunist fellows are working for America, selling ideas to America and in return are getting a very luxurious life. They are so much accustomed with the luxury that now they like to expand it more and more. They don't care for the development of their own nation. So, with the presence of these selfish fellows, we can't think about economic freedom. They can build up beautiful cities on the graveyard of poor masses.

These opportunist fellows are working for America, selling ideas to America and in return are getting a very luxurious life.

They are so much accustomed with the luxury that now they like to expand it more and more. They don't care for the development of their own nation.

America's ever-ending black money market now wants to capture the whole world by creating terror and establishing market dictatorship everywhere. After creating political and economic conflicts in various countries, it starts dominating them. Keeping all these in mind, the Centre of Security Policy at Geneva has warned us regarding the features of this economic terrorism in 2005.

The impact of America's invisible economic terrorism under the mask of the so-called global meltdown is experienced more in agriculture oriented eastern societies of Asia. Market oriented western societies of Europe are free from this terror. Europe is free because it is playing the role of long prevalent 'urgent agent' of America. On the other hand, our Asia is going to become a 'tragic target' without knowing anything.

A Chapter --- of Challenge ---

Karl Marx was greatly shocked when he saw the labourers were amidst the circle of hunger , thirst, sorrows, pain and exploitation. He lost his patience. He only started to think that who offered their life to build Nation's wealth, in return what they are getting? Is it a justice? His heart started crying for those helpless labourers. He further began his research. Finally his thinking, research and analysis came out as 'Das Kapital'. He invented the science of Socialism and addressed the labourers as the biggest losers and worst sufferers. So, they have nothing to lose except the chains. He motivated them to break the chain and further encouraged them to join hands and start fighting for survival.

All the above mentioned statements were the scenario before 150 years. Now we have passed away 125 years after Marx's death. At that time all rich capitalist countries were laughing at Marx. But they must regret if they can see the present scenario.

Now capitalism is going to be totally paralised in all over the world. In this situation, western society is again going back to Karl Marx and his principles. The selling of 'Das Kapital' has broken the previous record in Europe. The demand for this book at Marx's motherland German has increased so significantly that there are no stocks now.

'Das Kapital' is really filled with all practical relevance which can be used in the present context. After facing a downfall in controlling the economy, now the unsuccessful bankers and economists have started reading 'Das Kapital' just to find some alternatives. Youngsters are also appreciating Marxian principles and accepting that. It seems that there is no end to this concept of socialism invented by Karl Marx. It must be noted that the number of visitors to Marx's birth place near Trier have become more and more dramatically. Now 'Das Kapital' is again coming in the form of a movie produced by world famous film personality Alexander Kluge.

After facing a downfall in controlling the economy, now the unsuccessful bankers and economists have started reading 'Das Kapital' just to find some alternatives. Youngsters are also appreciating Marxian principles and accepting that. It seems that there is no end to this concept of socialism invented by Karl Marx.

The political leaders who were criticizing Marxian principles have now started appreciating this great thinker. In 'Das Kapital' Marx provided many facts which would enable us to think about society and economy for a while. The president of France Nicholas Sarkozy, the Finance Minister of German Peer Steinbrück and Pope Benedict 16 are highly appreciating 'Das Kapital'. Similarly, 'The Times' and 'The Daily Telegraph', two wellknown British newspapers regarded as the chief supporters of open economy, are also interested to reintroduce Marxian principles in the world economy. All are feeling the same thing that to adopt Marxian principles by its own critics is really a very big issue.

Socialism says that State is the owner of all capital assets and the distribution and development of such assets must be made by the State. It must take supreme power in controlling the economy.

It is said that money wants to serve all. nobody can imprison money. When this situation arrives, a burst takes place which the whole world is experiencing now. In his book, Karl Marx has pointed out many ways to manage capital assets and money. Now at the time of economic instability, capitalist countries are reading 'Das Kapital' to find out a solution. They also want capitalism to go graveyard and socialism to take birth. This is really a very good sign for the world. But socialism must play its role in a very significant manner to reach a right economic evolution through a correct cultural revolution. All of us must keep one thing always in mind that economy with no ethics is solely a soulless body alone. It is truly an everlasting Asian attitude towards the life that has immensely inspired us to follow the philosophy of low living and high thinking throughout the centuries. It must be correctly applied to the current economy for a real success of our social destiny. Orthodox principles of capitalism must be given up and progressive approach with new innovative ideas and thoughts of socialism must be accepted with much priority by masses for the long march of heroic human history in our Asian economy.

Asia at Time's Square

Starting from the ancient time to medieval and modern period, Asia has witnessed so many foreign invaders. Asia has faced the attack of external powers in order to establish their colonies in its virgin land. Till the beginning of 19th century; the western forces from Portuguese, France and Britain were ruling over Asia from time to time. They looted and robbed Asia's wealth again and again. But now this system has changed. Without coming here, now America is looting our Asia in a different way. Like the white people were imprisoning the Negros of Africa to make them slaves in their countries, America is also taking away experts from Asia with an attraction of heavy salary system or big beneficial budget. America is applying Asian intelligent mind either in its motivated science or in profit oriented technology and getting so much success of surplus value. If Asians will be bribed by America like this, then the day will come when we will have no soul and spirit with us.

The concept of globalization advocates that 'the world is a village'. But in reality due to the impact of this globalization now Asia has become a village graveyard. Our civilization is going to become the dust of fire. All Asians must come together to save Asia. Asia's glorious identity must be recovered and discovered again. Now Asia has lost its destination in a typical darkness and has been trapped in the square of tragic time. But we must not forget that 'The Light of Asia' is still present in an abstract form and it can show the direction to Asians in this darkness too. Asians must join hands to cross this crisis by following 'The Light of Asia'.

The Light of Asia

Asia is the land of great saints. It is always characterized with humanism. Though in the course of time humanism is clouded with fog, still it must come with a thunder. Now without wasting time and hope, we must recall humanism again. Let's follow 'The Light of Asia' and his eternal flare of human spirit. Yes, now in this tragic transition Buddhism must show us light to overcome almost all the barriers in between the alienated Asians like us. Yes, this is the right time to be intimated on our part to save Asia, the greatest continent of eternal culture and civilization.

Buddhism has played its childhood in India, got matured in China and achieved its height in Japan. Buddhism is free from caste, class, terror, violence and war. There is no place of inequality and injustice in Buddhism. It always advocates for love, peace and humanity. It is the only model religion of mankind in real sense. It never misguides the world. It is the only religion in the world which can keep Indians, Chinese, Japanese and Nepalese united with each other. Eagle America can never defeat Buddhism in spite of all evil attempts. It has no capability to face that. So, by following the principles of Buddhism Asians must overcome this economic terrorism. Japan must take leading part to enable the Asians join hands. It must reestablish Buddhism in Asia to show light in this darkest phase of economic terrorism.

Buddhism and Marxism both are two sides of the same coin.

Since a long day our Government is focusing more on industrialization and forgetting agriculture. Now let's go to country yard. Agriculture will save us. We request all the sons of soil, mothers and masses to join hands. Capitalists and entrepreneurs never care for our villages. Even Government has done nothing significant for the development of villages. The villagers who depend on agriculture mostly never get enough facilities from our administration. The people who provide food to the whole world are getting only hunger and starvation. They even commit suicide for this hunger. So, isn't it high time to think about our farmers? Let's provide justice to them.

Agriculture :The real culture of Asia

It was a time when there was no industry. At that time also people were leading life. They were considering earth as mother and earning their livelihood from agriculture. After industrial revolution, agriculture started walking in the path of destruction.

Machines started producing food. No need of man-power was required much. So, agricultural workers migrated to cities for working in industries. Our educated masses started to dislike agriculture. This had called for agriculture and farmers to be ignored.

Now industries are facing depression. Only agriculture can control the economy if managed properly. Government has to spend on agriculture to save the economy from this critical situation. For the development of agriculture our irrigation system must be better. Government has to dig new canals and restructure old and unused canals. All canals must be connected with rivers for making our irrigation system broad. If our irrigation system becomes developed, then production will definitely be more.

It is discussed before that we are observing the branches, fruits and leaves of the American tree of economic terrorism. But its root has been planted many years ago. This poisonous root was planted first in the holy agricultural lands of Asia. We can clearly get the proof after examining a case-study. Let's go to the flashback. Before 25 years, Indian Government was importing food seeds from America for agricultural use. Our farmers were harvesting those and providing food to the masses. But now it has been discovered that America is

the main culprit behind the breakdown of agrarian base of India. Not only India, but the agriculture of other Asian countries also suffered due to their import deal with America. Now Asia has become only the silent witness of this conspiracy created by devil America. Many intellectuals and experts may not believe, but it's true that America applied its master mind to break our agriculture system which is regarded as the backbone of our nation 25 years ago. Now it has been discovered that while America was exporting wheat seeds to India and other Asian countries, along with that wheat it also added poisonous grass seeds like Hunds Tongue, Spiny Burr and Giant Rag which are used for the preparation of poisonous medicines. It was not noticed at that time as generally grass may come with food seeds. It is a general phenomenon. But in a very shrewd manner America started its operation first through this system to break Asian agriculture. The main aim of this master plan was to make the Asian food pattern poisonous and polluted. How unfortunate and unlucky we are! It took 25 years for us to recognize the evil plans of devil America. Due to our ignorance at that time, now our agriculture is suffering. America was so cunning in its operation that it didn't directly export those poisonous grasses. Rather, they came to India via other countries like France, Hungary, Philippines, Russia and Australia. A country must not be a friend country which can pass its crime to other countries so easily. So, we must be aware of the fact that America is not worthy of any kind of deal.

The poisonous grasses which were exported with wheat seeds 25 years ago by America have brought a danger for our countrymen, animals and birds now. Along with this, also our Asian environment is getting polluted day by day. After getting informed about all the facts, now also India is importing wheat seeds from foreign countries. It is really a very unfortunate condition for us. We must think about it. We must develop our agrarian base so strong that there will be no need to depend on foreign countries to import food seeds. Now research and surveys are conducted by various environmental organizations in Orissa and other parts of India to find out those poisonous grasses from our agricultural fields and remove them completely from our agriculture. This is really a very encouraging and

Japan has to come forward and play the leading role to convey The Light of Asia Buddha's message to all the Asians for the sake of a beautiful future Asia.

welcoming step. We Asians must support these organizations for the sake of the development of our nation.

Agriculture is the only culture of ultimate human hope. Both China and Japan have proved that. In both the countries, the methods and techniques adopted for agriculture are really the best. This development can't be hurt by eagle America. Our Asian agriculture and farmers can never be dominated by America. Japan, India and China must join hands and start 'Save Asia Movement'.

Save Asia Movement : A Movement of Mankind

The real hero of this great movement will definitely be the backbone of our nation. Yes, the farmer will lead the movement. He is not only the son of soil, but also an alert guard of the whole society. No dacoits, gangsters and mafia dons can defeat the farmer. How can a protagonist be defeated by antagonists? But now the political system of our country is repeatedly exploiting our farmers. The major portion of winning votes comes from farmers. But in return they get false promises and hunger. Industrialization is getting established on the skeleton of agriculture. Villages are immersed in the flow of urbanization. Crimes and evils are increasing day by day. Our administration and law have become weak. Now everything has crossed the limits. These kinds of exploitation will no longer be tolerated.

The time has come to save Asia from ashes.

Japan has to come forward and play the leading role to convey The Light of Asia Buddha's message to all the Asians and encourage them to construct a beautiful future Asia. All the Asians must be united for this one and only noble goal - 'Save Asia' !
